

# 2019 Northeast Ag Expo Small Grains Field Day

## Impact Report

### The Partners

The North Carolina Cooperative Extension Centers of Camden, Chowan, Currituck, Gates, Pasquotank, and Perquimans, the N.C. Small Grain Growers Association, Inc., as well as farmers, other commodity groups, and agribusinesses.

### The Objective

To provide up-to-date information on crops, technologies, and crop production related practices to growers and other members of the agricultural community.

## Jamie Stallings & Sons Farms

Hobbsville, NC

### Topics Covered

- Foliar fertilizers
- Disease management practices
- Weed management practices
- Nitrogen management practices
- Wheat management practices for maximum profitable yields

### Featured Commodity

### Comments by Participants

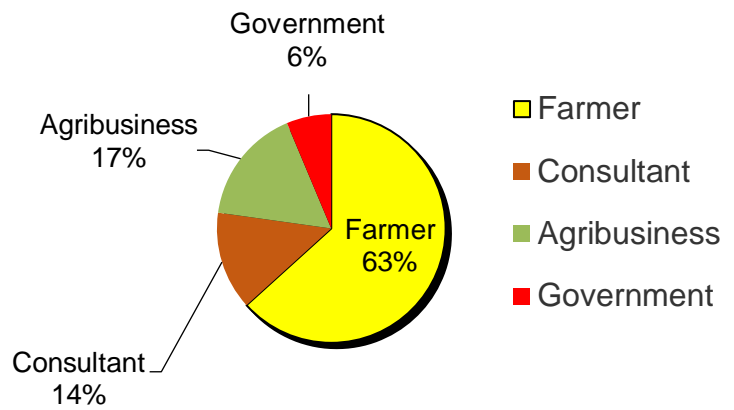

- Farmers that come to my business talk about the info they get from you.
- It was a lot of good information to apply to my farm operation.
- Very good. Dr. Post's work is excellent.

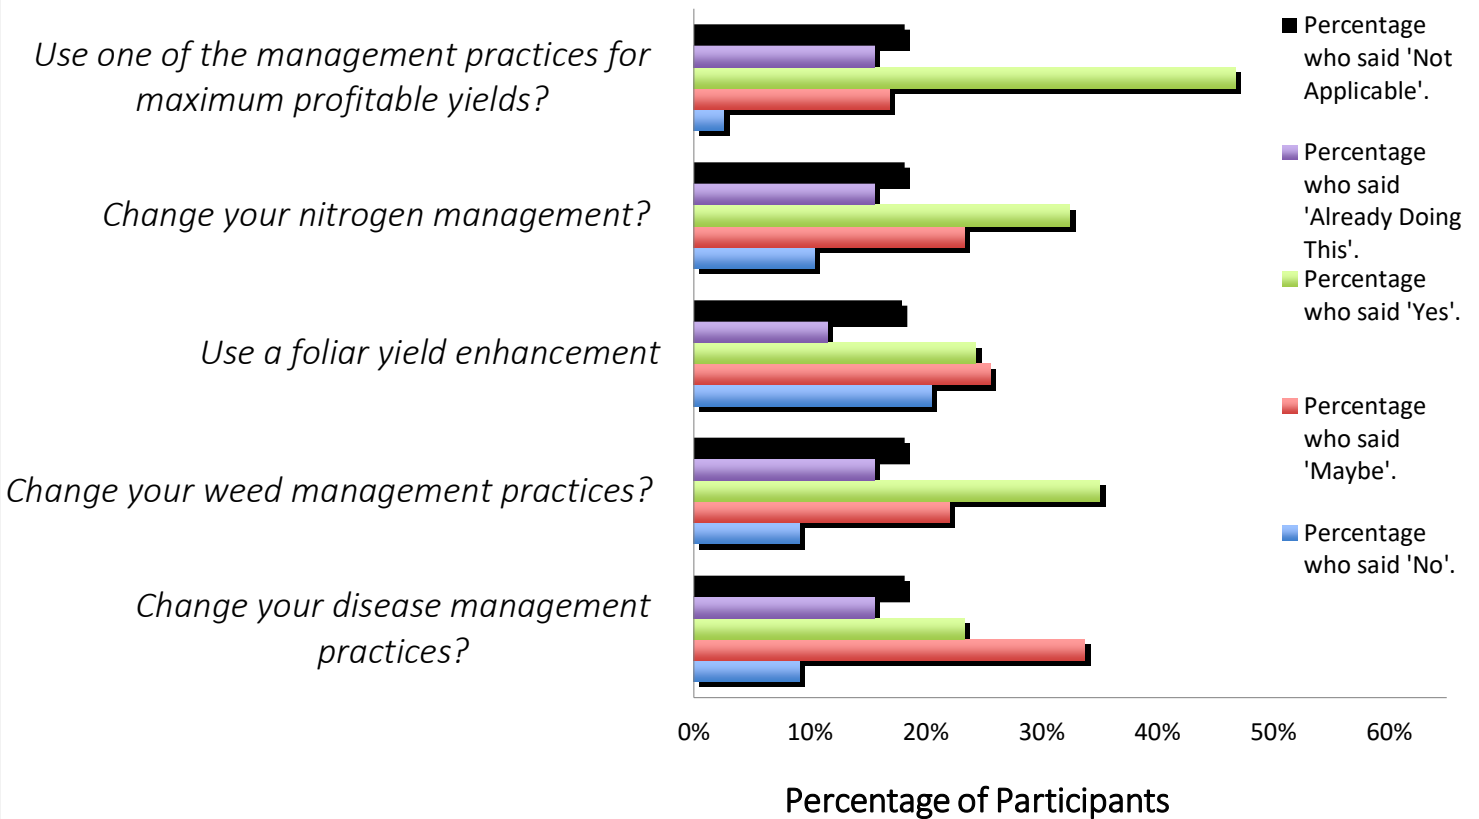

## The Participants

- 137 in attendance with a total of 149,355 acres of cropland and 89,126 acres of small grains represented
- 51 farmers received pesticide license credits
- 39 commercial pesticide applicators received a total of 78 credits, which preserved a total of \$242,424 in wages and saved them \$1,560 in registration fees
- When asked if they had benefited from previous small grain field days, 35 participants had an average yield increase of 5.8 bushels per acre for a total value of \$2,776,925

## Occupation of Participants

## Adoption of Information

The charts are based on 79 evaluations completed out of 137 participants, which is a return rate of 58%.
